

Dongrun Tang | CV

- » Major: Automation
- » Status: Tsinghua University undergraduate student
- » Interests: Embodied intelligence and autonomous robotic systems
- » Activities: Table tennis, Reading, Music

»»» Summary

Motivated first-year undergraduate majoring in Automation at Tsinghua University. Proficient in C/C++ programming and LaTeX typesetting for academic writing. Actively participates in practical projects to build engineering hands-on capabilities. Strongly interested in embodied intelligence and robotics research. Maintain regular table tennis and long-distance running to sustain self-discipline and physical fitness.

»»» Education

2025 - now	Tsinghua University, Automation	The University
	» A first-year undergraduate majoring in Automation » Systematically learn fundamental mathematics, circuit principles and programming knowledge	
2022 - 2025	The Second Middle School of Aksu	The High School
	» Comprehensive science education focusing on mathematics, physics and chemistry » Cultivation of rigorous learning methods and growing interest in engineering disciplines	

»»» Honors and Awards

	Honor for outstanding youth league branches	Tsinghua University
--	--	---------------------

»»» Personal Skills

Programming	» C, C++, Python for algorithm practice. » Familiar with basic programming specifications and modular development ideas.
Typesetting	» Skilled in LaTeX for academic reports and formal resume compilation.
Soft Skills	» Strong self-management and sustained learning ability. » Good teamwork awareness and communication skills in group activities.

»»» Research Interests

Main Directions	» Embodied intelligence and intelligent robotic systems. » Perception, planning and interaction of autonomous agents.
Self-study Focus	» Fundamentals of control theory and machine learning. » Continuous tracking of cutting-edge progress in Artificial General Intelligence.
